

## How to Use PlaneRequestBot

Download Python 3 if not already installed

Check Add Python to PATH in installation box

Navigate to the folder where TwitchChat.py is in the command prompt.

In this case, my file is located in C:\Users\[redacted]\PythonFiles\RequestBot

Type "cd.." to go back to the previous folder

Type "py Bot.py" and click enter. The following is a good output

```
C:\Users\[redacted]>cd PythonFiles
C:\Users\[redacted]\PythonFiles>cd RequestBot
C:\Users\[redacted]\PythonFiles\RequestBot>py Bot.py
: GLHF!
:tmi.twitch.tv 002 planerequestbot :Your host is tmi.twitch.tv
:tmi.twitch.tv 003 planerequestbot :This server is rather new
:tmi.twitch.tv 004 planerequestbot :-
:tmi.twitch.tv 375 planerequestbot :-
:tmi.twitch.tv 372 planerequestbot :You are in a maze of twisty passages, all alike.
:tmi.twitch.tv 376 planerequestbot :>
planerequestbot: anerequestbot.tmi.twitch.tv 353 planerequestbot = #adamtheengineerd :planerequestbot
:planerequestbot.tmi.twitch.tv 366 planerequestbot #adamtheengineerd :End of /NAMES list
```

Bot will connect to your chat and start receiving messages and sending replies if commands are typed
